<b>DESCRIPTION/ABSTRACT</b>
<p>The SLOOP Project aims at promoting and facilitating the integration of <b>eLearning, work-based learning</b> and <b>face to face education</b> in schools, colleges, universities, training centres and by teachers/trainers and, generally speaking, by everybody who is involved in planning and running pedagogical paths.</p> <p>Such an integration, in fact, improves the efficacy of learning by allowing to customise learning paths, to support learners with purposely developed on-line materials and with a system of relations with no limits of time and space.</p> <p>To meet such a goal, the project intends to:</p> <ol style="list-style-type: none"> <li>1. define a <b>model of LOs</b> in tune with international standards (pedagogical and technical characteristics and metadata);</li> <li>2. implement <b>a free LO Management System</b> allowing LOs development, modification and use;</li> <li>3. develop <b>collections of LOs</b> useful for teachers' training and to be used with students.</li> </ol> <p>The project pursues also the aim of contributing to the fulfilment of the seventh point of the <b>Declaration of Copenhagen</b>: <i>"Giving attention to the learning needs of teachers and trainers within all forms of vocational education and training."</i></p>
